BT Graduate Programme

BT - Who we are

We're one of the world's leading communications companies, known globally as a major technology player - pioneering digital advances that will shape the future.

We're a global company with over 89,000 employees and operations in over 170 countries worldwide. And to keep our millions of customers happy, our business activities are pretty wide-ranging too. Internet and broadband is big for us, but we're a major player in networked IT services as well.

We help businesses become more connected, more productive and more competitive. And we help people to communicate anywhere, at any time and with any technology they want. BT provides networked IT services and professional services to large corporate and public sector customers as well as other telecom operators across Europe.

BT Graduate Programme

Lots of our senior leaders have come through our graduate programme. Some have even become CEOs. We're always on the lookout for more people like them. You might not want to be a CEO, but if you've got the drive, and raw talent, we'll give you the foundations to kick start your career.

You'll spend two years doing a rotational role, which will give you the chance to experience different areas and build a clearer picture of where you want to take your career.

The programme will see you explore different roles such as Project Management, Professional Services, Sales Engineering, Network Design & Implementation, IT & Security.

Throughout your time as a graduate in BT Global services you will be trained and mentored starting with an induction week which will enable you to build a worldwide network with your peers around the world.

Your experience in BT is aimed at developing your potential to become a senior manager. Therefore we wish to recruit fast learning, flexible and self-sufficient individuals who think they can make a real contribution to our company.
