Register Today! 2015 European Engineering Virtual Careers Fair | November 26th

Whether you're launching your career, or you have a strong professional background, we think you'll enjoy learning how you can play a vital role in our organization.

Our engineering teams make a positive impact on virtually every aspect of our business. They help to manufacture our products. They help to create new medical breakthroughs. And they're responsible for everything from material sciences and packaging, to operations and facilities management. Join us and you could use new alloys to replicate the function of human organs. You could embrace emerging technologies to develop biometric solutions for skin repair. Or you could develop new manufacturing and packaging systems to create a more sustainable future. Wherever your engineering career takes you – you'll be at the heart of technology-driven innovation, developing solutions to help people everywhere live healthier lives.

You're invited to attend one of our virtual presentation sessions on the 26th of November. These sessions will introduce you to the exciting world of career opportunities that awaits engineers joining our company across a range of disciplines and levels:

1pm CET - Graduate careers as limitless as the lives you'll touch

This session is designed to introduce engineering students and graduates to the exciting breadth of internships, graduate roles and leadership programmes available at Johnson & Johnson across EMEA.

6pm CET - Be part of something bigger

This session focuses on career opportunities available to experienced engineers and professionals.

Both sessions include a one-hour web conference including audio Q&A. Followed by one-hour written Q&A.
