

## Production Solutions – Internship Program 2026

Daniel De La Cruz

Production Solutions/ Europe area Engineering  
lead.

# Project Description

- Internship Opportunity: Oil & Gas Technology & Service Operations Boot Camp
- Department : Production Solutions.
- Department Focus : Coiled Tubing Interventions, Pumping services, Chemicals for well production control and improvements.
- Location : Ortona ( Abruzzo ) , Italy.

# Internship Bootcamp Program – Build Your Future in Energy

Our department's Internship Bootcamp Program, is a structured, hands-on development journey designed to prepare the next generation of energy professionals.

This internship is built around three progressive milestones, each carefully designed to develop technical foundation, industry awareness, and professional confidence.

By the end of the program, interns gain a strong foundation in oilfield operations, emerging technologies, and the skills needed to succeed in a dynamic, global organization.

# Internship Bootcamp Program – Build Your Future in Energy

## Milestone 1: Oilfield Foundations

Interns begin by building a strong technical baseline through:

- General oilfield operations and terminology
- Basic engineering and operational calculations
- Exposure to Halliburton equipment and tools
- Understanding how different services work together in real field environments

Outcome: A solid understanding of the oilfield ecosystem and core operational concepts.

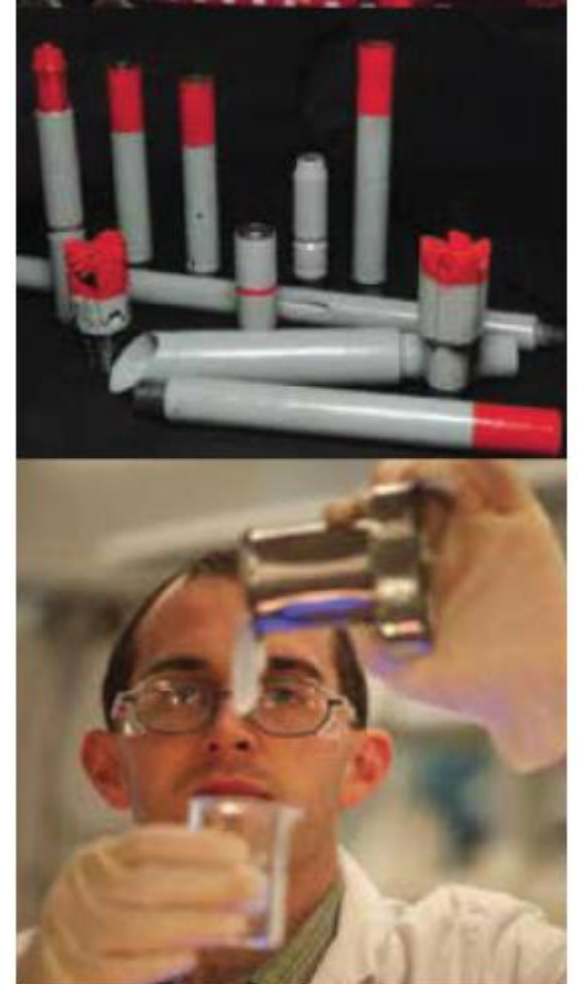

# Internship Bootcamp Program – Build Your Future in Energy

## Milestone 2: Chemicals, Fluids & Nitrogen

In the second phase, interns deepen their technical knowledge with a focus on:

- Oilfield chemicals and fluid systems ( Production solution portfolio)
- Nitrogen services and applications
- Safety, quality, and performance considerations in specialized operations
- How chemistry and fluids impact well performance and efficiency
- Participate in Production solution Lab Start Up, quality plan, Lab rules for daily activities and equipment calibration plan.

Outcome: Practical insight into critical technologies that drive successful operations.

# Internship Bootcamp Program – Build Your Future in Energy

## Milestone 3: New Technology & Professional Skills

The final milestone prepares interns for the future of the industry by focusing on:

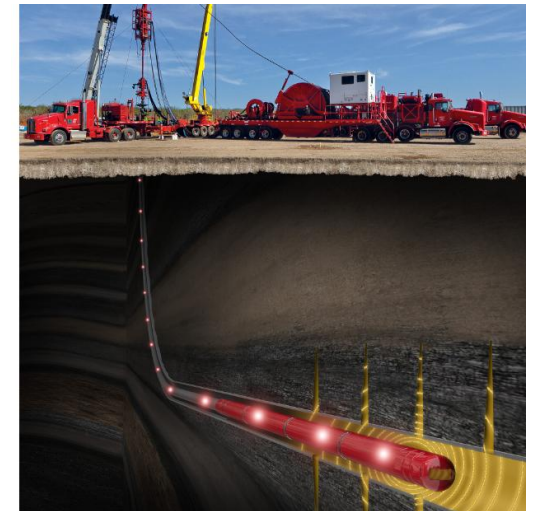

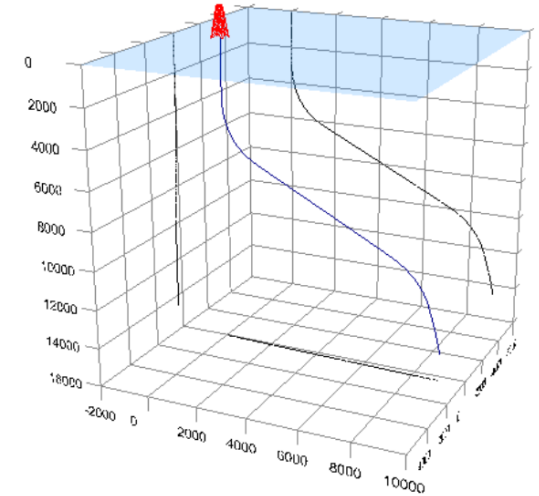

New and emerging technologies

Digital tools and innovation in oilfield services

Essential soft skills including communication, teamwork, and problem-solving

Professional presence and career readiness

Outcome: A well-rounded intern ready to contribute technically and professionally.

# Internship Bootcamp Program – Build Your Future in Energy

## Exposure & Mentorship

Throughout the internship, participants will:

- Interact with middle and senior management
- Receive feedback and performance assessments
- Gain visibility within the organization
- Learn directly from experienced professionals and leaders

This exposure allows interns to track their progress, understand career pathways, and build meaningful professional networks.
